Online Curriculum Guide

A Parent's Guide to Online Learning
with Sunshine State Homeschoolers

2026–2027

**Flexible options. Clear course choices.
Support for every stage of learning.**

Table of Contents

Welcome	3
Understanding Your Online Curriculum Options	4
Kindergarten–5th Grade.....	5
Grades 6–12	7

This guide is organized into Kindergarten–Grade 5 and Grades 6–12 sections. Each section includes curriculum comparisons, course options, pricing, and optional services.

Welcome

Sunshine State Homeschoolers (SSH) offers multiple online curriculum options because no single curriculum is the best fit for every learner. Home education families may choose the option that best matches their student's learning style, educational goals, and desired level of structure.

Parent Responsibilities

Provide daily educational supervision.

Grade written work when applicable, unless teacher-supported services are selected.

Maintain home education records and complete required reporting or evaluations.

Monitor student progress and course completion.

SSH Responsibilities

Coordinate curriculum access, initial course setup, or teacher-supported enrollment.

Help families compare curriculum and course options.

Provide available provider progress and completion information.

Important Home Education Notice

Purchasing curriculum through Sunshine State Homeschoolers does not enroll a student in a private school. Parents remain responsible for complying with the requirements of their chosen home education option, including records, evaluations, and required reporting.

Understanding Your Online Curriculum Options

SSH offers self-paced curriculum and fully online teacher-supported options so families can choose the level of structure, flexibility, course variety, and instructional support that best fits their student. Available options vary by grade level and selected program.

Accelerate Education

A structured, comprehensive online curriculum with interactive lessons, multimedia instruction, assessments, and a broad selection of core and elective courses.

Depending on grade level and the selected package, families may choose Core or Comprehensive access. Comprehensive access provides a wider selection of electives, world languages, fine arts, technology, career and technical education, and specialty courses. Optional AE Instruction may also be added.

Edmentum

A comprehensive online curriculum emphasizing mastery-based learning, structured course progression, and individualized academic support.

Expanded Course Options may be added for additional electives, foundational support, advanced coursework, honors and Advanced Placement courses, career and technical education, and specialty subjects. Optional Teacher Grading Services are also available.

SSH Personalized Core Learning Package

Available for Kindergarten–Grade 5, this flexible package combines adaptive online instruction, educational enrichment resources, and printable grade-level workbooks. It is designed for families who want an affordable curriculum while remaining actively involved in daily instruction.

Fully Online Teacher-Supported Program

For families seeking a more structured online program, SSH offers fully online classes through EdOptions Academy. Certified teachers provide instructional support, grading, and academic feedback within the online program.

This option is available for grades K–12 at \$550 per month and may be used while the student remains in a home education, umbrella school, or private school program.

Choosing the Right Curriculum

Families should consider the student's grade level and academic needs, the amount of structure and independence needed, preferred learning format, desired electives or advanced courses, optional teacher support, budget, and long-term academic goals. SSH can provide consultation services to assist families with comparing available options and developing an appropriate course plan.

Kindergarten–5th Grade

Families may compare three self-paced elementary curriculum options and a fully online teacher-supported program.

Elementary Curriculum Options

SSH Personalized Core Learning Package

An affordable, flexible elementary program combining Edmentum Exact Path, Brainzy by Education.com, Starfall, and printable grade-level workbook resources. The package strengthens foundational reading, language arts, mathematics, science, and social studies while allowing parents to remain actively involved in instruction.

Accelerate Education for K–5

Students receive a structured elementary program covering core academics, health, physical education, fine arts, music, and technology. Optional printed workbook bundles are also available.

Edmentum for K–5

Students receive a comprehensive elementary curriculum with interactive instruction, assessments, adaptive learning, and progress monitoring across core and enrichment subjects.

Fully Online Teacher-Supported Program for K–5 — \$550 per month

This option provides a structured elementary program through EdOptions Academy with certified teacher support, grading, and academic feedback. Students complete interactive online coursework while parents continue to supervise learning at home.

Elementary subjects include English Language Arts, Mathematics, Science, Social Studies, Health, Physical Education, and enrichment activities.

Grades 6–8

Families may choose self-paced curriculum, expanded course access, optional teacher services, career and trade preparation, dual-credit courses, or a separate fully online teacher-supported program.

Fully Online Teacher-Supported Program for Grades 6–8 — \$550 per month

Students complete structured online courses through EdOptions Academy with certified teacher support, grading, and academic feedback. This option is designed for families who want more direct teacher involvement while maintaining their existing homeschool, umbrella school, or private school enrollment.

Available subjects may include English Language Arts, Mathematics, Science, Social Studies, Health and Physical Education, World Languages, Career and Technical Education, and electives.

Optional Expanded Course Options

Families may add expanded course access when a student would benefit from additional electives, world-language study, advanced coursework, or targeted academic support. Expanded options are available for an additional fee and must be selected based on the student's grade level, readiness, and academic plan.

Accelerate Education Comprehensive Course Access

Students receive the standard middle school core curriculum along with a broader selection of world languages, fine arts, technology, coding, keyboarding, character education, additional science options, and other electives.

This option may be appropriate for students who want greater course variety, wish to begin a world language, or are ready for advanced coursework such as Algebra 1.

Edmentum Expanded Course Options

Advanced Coursework: May allow academically ready students to complete select high school-level courses, such as Algebra 1, when appropriate and approved as part of the student's academic plan.

Foundational Support and Remediation: Helps students strengthen reading, writing, mathematics, algebra-readiness, and science skills before or alongside grade-level coursework.

Additional Electives: Provides broader choices in technology, career exploration, business, health science, engineering, agriculture, family and consumer science, and other areas.

Optional Teacher Services: Edmentum Teacher Grading Services review written assignments, projects, labs, and activities, generally within two business days. AE Instruction adds teacher support for Accelerate Education courses; the exact grading, feedback, communication, response time, and course coverage are confirmed before enrollment. Both services are optional and available for an additional fee.

High School Curriculum and Courses (Grades 9–12)

High school families may compare core curriculum, expanded course access, teacher services, advanced coursework, and career preparation.

- AP Microeconomics* — *Available through Edmentum*

Honors courses are available in selected English, mathematics, science, social studies, and world-language subjects.

* Courses marked with an asterisk are commonly used toward Florida public college or university admission and/or Bright Futures academic coursework. Eligibility depends on the official course code, course level, sequence, laboratory component, graduation year, and current program requirements. An asterisk does not mean the course is required for every home education student.

Optional Expanded Course Options

Families may add expanded course access when a student would benefit from additional electives, honors or Advanced Placement coursework, career and technical education, certification-preparation courses, or targeted academic support. Expanded options are available for an additional annual fee and are selected based on grade level, prerequisites, readiness, graduation plan, and postsecondary goals.

Accelerate Education Comprehensive Course Access

Students receive the standard high school core curriculum along with a broader selection of specialized courses and electives, including career and technical education, technology, programming, business, health science, teaching, architecture, construction, agriscience, certification preparation, and other specialty areas.

Many core academic, honors, and Advanced Placement courses are already available through the Core option. Comprehensive access is designed for students seeking greater elective variety or specialized career coursework.

Edmentum Expanded Course Options

Honors and Advanced Placement: Includes select honors and AP courses for academically prepared students who meet applicable prerequisites.

Foundational Support and Remediation: Includes readiness courses in English, mathematics, algebra, science, and study skills.

Career and Technical Education: Provides broader options across business, information technology, health science, engineering, agriculture, law and public safety, hospitality, human services, skilled trades, and other options.

Additional Electives: Adds fine arts, social science, technology, college-readiness, and specialty electives.

Optional Teacher Services

Teacher-supported services are available for families who would like additional instructional involvement beyond the standard online curriculum. Edmentum Teacher Grading Services provide review and feedback for written assignments, projects, labs, and activities, generally within two business days.

AE Instruction provides additional teacher support for Accelerate Education courses. The specific level of grading, feedback, communication, response time, and course coverage will be confirmed before enrollment. Both services are optional and available for an additional fee.

Course availability, pricing, and provider offerings are subject to change. SSH will confirm current options before enrollment. ASU Universal Learner dual enrollment information is provided separately through the SSH Dual Enrollment page.

Career & College Pathways (Grades 6–12)

In addition to standard high school course options, students may choose specialized pathways that provide career preparation or opportunities to earn college credit. These programs are optional and have separate enrollment requirements and fees.

Career & Trade Preparation

Career & Trade Preparation

Online Career & Trade Prep courses powered by Edmentum Career and Interplay Learning use lessons, short videos, assessments, and interactive 3D simulations to build foundational skills in high-demand trades.

Available trade areas include Appliance Repair, Clean Energy, Electrical, Facilities Maintenance, HVAC, Multifamily Maintenance, Plumbing, Residential Construction, and Solar Energy.

Career & Trade Prep Bundle: \$400

Dual Credit

ASU Universal Learner Courses

Sunshine State Homeschoolers partners with Arizona State University to offer flexible, fully online college-level courses for high school students. Students may begin without submitting a high school transcript, placement test, or minimum GPA.

Students complete the course before deciding whether to place the final grade and college credit on an official ASU transcript. Because transfer policies vary, families should confirm that credits will meet the requirements of the student's intended college or degree program.

Students may choose from general education, career-focused, and certificate pathway courses in areas such as business, health, technology, engineering, education, behavioral sciences, sustainability, and computer science.

ASU Universal Learner Course: \$375 per course
